- ▶ Franck is the Ernst & Young European Pension Market Leader
- ▶ He has over 25 years experience in providing pension consulting services, addressing issues created by reforms and restructuring, and advising private and public companies on the design, the risk management and the financial modeling of pension schemes
- ▶ His assignments for governments and State bodies include:
 - ▶ Appointed actuary (since 2003) of the European civil servants pension scheme for the European Commission – Eurostat (27 countries), advising on the assessment of the funding contribution according to long-term solvency regulation.
 - ▶ Advising the French State Department managing the main public sector pension funds for an organizational and methodological review of the demographic, economic and financial long and mi-term projections
 - ▶ Advising Eurostat for the monitoring of the Statutory Pension and Transitional Allowance Scheme of Members of the European Parliament
 - ▶ Advising the OECD on the valuation of employee benefits plans and on the pension fund reserve monitoring
 - ▶ Assisting the French Court of Auditors for the certification of the methodology and valuation model for estimating the pension deficit toward French Civil servants.
 - ▶ Advising the national pension scheme for French artisans and shopkeepers on the financial modeling of the long term equilibrium
 - ▶ Assisting Électricité de France and France Telecom for integrating their specific pension schemes into the French State pension scheme.
 - ▶ Advising the French Ministry of Sports for setting up a new pension scheme for French high-level sportsmen, developing simulation models for various scenarios for a new pension program.
- ▶ He is a qualified actuary from the French Institute of Actuaries.
